Leopard 40 Powercat (2023)

Leopard 40 Powercat

The **Leopard 40 Powercat** presents a new generation of cruising possibilities by delivering optimal reliability, speed, stability, and fuel consumption. Built by Robertson & Caine and designed by naval architects Simonis Voogd, it is masterfully engineered and maintains an excellent weight and trim ratio rarely found in catamarans of this size. Superior craftsmanship and materials, including Leopard's signature side glazing that runs the yacht's length, show off the vessel's elegant lines. Its innovative design also includes an interior helm station that provides maximum safety, with a perfect peripheral view of the sea while remaining sheltered from the elements. The sleek roof integrates the largest flybridge found in a 40-foot vessel. Each living space is intentionally

designed with comfort and functionality in mind. Ample communal space is found throughout, including the aft cockpit, flybridge and aft decks. Unique to the Leopard line, sunbathing areas are accessible through the side decks or directly from the saloon through the front door. The main deck is seamlessly designed on a single floor, ensuring optimal flow throughout. At the bow, the saloon becomes a gathering place to relish another day at sea. The fully equipped L-shaped galley, complete with a full-sized fridge, is conducive to conversation and facilitates meal preparation. The three cabins feature generous island beds with scenic sea views. There is also abundant storage throughout the entire yacht, ensuring neat organization of all essentials.

General

Year:	2023
Price:	\$1,664,140
Additional Charges:	Plus GST, Duty & Freight
Boat Type:	Catamaran
Hull Type:	Power - Multihull
Location:	Europe
