Rhea 850 Timonier

Same charming silhouette of a small traditional fishing boat, same semi – planning hull which guarantees fluid navigation, this « Small big boat », enhances the Rhea 800 's characteristics in an extra-large version, whilst maintaining excellent manoeuvrability even single-handed. The **Rhea 850** conserves the brand's traditions and style: a spacious cockpit, high-quality materials, solid precious wood, reassuring deck fittings and handholds, strength, top quality artisan work, and excellent precise finishing touches. It carries on Rhea's standards: a reassuring feeling of comfort and cosy interiors enhanced to the maximum in this model thanks to beautiful equipment designed by Oliver Flahault to go further and longer.

« This real 8,5 m long boat stands out by his large habitability which could be compared with the Rhéa 11m, suitable for a comfortable cruise. »

Rhea Marine stays on your side to fulfil your dream.

General
